TITLE : LIQUID CRYSTAL DISPLAY PANEL

ABSTRACT : PROBLEM TO BE SOLVED: To improve the display quality of a semitransmission and reflection type liquid crystal display panel both in a reflection state and in a transmission state.

SOLUTION: The liquid crystal display panel having a first substrate 1, a second substrate 5 placed opposite to the first substrate 1, a liquid crystal layer 15 provided between the first and the second substrate 1, 5, a first color filter 9 provided either on the first substrate 1 or on the second substrate 5, a semitransmission and reflection plate 24 and a second color filter 28 is adopted. A display with excellent color saturation is made possible by using the first color filter 9 in the case where a reflection display is performed with the semitransmission and reflection plate 24 and by using the second and the first color filters 28, 9 in the case where a transmission display is performed.
